If you need to update this application, go to the Learning Center home page. Click on the Distance Learning Tools, Training Resources, or Computer Setting Help link in the left navigation bar.

Security Warning Responses

While you are accessing an online course, you may see the following warnings. Be aware that sometimes these security messages are displayed behind the active pop up window, making it "freeze" temporarily until the user clicks Yes or No.

The recommended response follows each warning.

• **Security Warning**: Do you want to view only the webpage content that was delivered securely?

Select NO	(if you select	Yes, you will s	see "Navigation	has been	canceled.")
-----------	----------------	-----------------	-----------------	----------	-------------

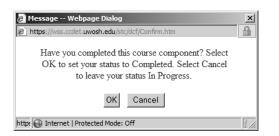

• Security Warning: This page has an unspecified potential security risk. Would you like to continue? NOTE: This security warning appears because the content is being loaded into a frames window.

It is OK to select YES

Internet I	xplorer	x
£	This page has an unspecified potential security risk. Would you like to continue?	

- Security Warning: The current webpage is trying to open a site in your Trusted Sites list. Do you want to allow this? Select YES
- Have you completed this course component?
 - Select **OK** to set your status to Completed.
 - Select **Cancel** to leave your status In Progress.

Frequently Asked Questions

What is my Logon ID?

When your Learning Center account was created, either you received a Logon ID Email from the Learning Center Registration Staff, or your Logon ID was communicated to your supervisor.

Review your email history for an email received from <u>regstaff@uwosh.edu</u> that has the words Logon ID and your last name in the subject line to find the email that contains your Logon ID. If you cannot find this email, contact the Learning Center Registration Staff for assistance.

I launched a course, but the only thing that displayed was a blank white screen. Why is this happening?

Some content is being blocked.

Refer to the instructions in this document for your Internet browser to see the Pop-Up settings necessary for viewing content in the Learning Center.

Why isn't there a Start Topic link to start a course?

If a course has required prerequisites, the prerequisite courses must be completed before a Start Topic link will be available.

Click on the course Prerequisites tab and complete the courses that are listed.

Why can't I advance to the next slide in the CBT?

There is likely an interactive component or activity on the slide that has not been completed.

Review all content on the slide again looking for an activity or interactive component that may have been missed. When all activities and interactive components are completed, a Next button should appear on the navigation bar.

Why isn't there a Start Topic link to start the next component of a course?

If a course has multiple components that must be completed in order, a Start Topic link for a component will not be available until the previous required components show a completed status.

Review the course components on the Course Content tab to make sure you have completed all required components in the order listed.

Why does my course show a Started In-Progress status even though I think I finished the course?

The most common reason for this to happen is not having the proper computer settings in place prior to beginning the course.

Refer to the instructions in this document for your Internet browser you are using and follow the instructions for changing your Cookie settings.

Please Note: Correcting the settings will not automatically update your status to completed. The course needs to be restarted and reviewed again.

Another reason a course status may display as Started/In-Progress, even though you have reached the end of a course, is because a portion of the course was skipped by mistake.

Restart the course and review the material again, paying close attention to sections that have multiple navigation options.

What does a File Not Found error mean?

The course component that you are trying to access has been moved or renamed, and cannot be found. This can occur if the link in the component is broken and needs to be fixed. Another reason this can occur is if the course components have changed since the last time you accessed the course.

Please contact the Learning Center Registration Staff for assistance.

I clicked on the Exit button at the end of a course, but nothing happened. What should I do?

Exit the course by closing the window.

Please contact the Learning Center Registration Staff for assistance.
