Clearing Your Cache Microsoft Internet Explorer Version 08

Why? Your browser may remember, and display, old versions of web pages and data even after you make changes. Clearing the cache ensures the most up to date information is displayed.

- 1. Click on "Tools" in the menu (tap on the Alt key first if the menu is not visible). Choose "Internet options" from the menu.
- 2. While on the "General" tab, click on the "Delete" button in the "Browsing history" section.
- 3. Make sure checks are in the boxes labeled "Temporary Internet files and website files", Cookies and website data", and "History". Then click on the "Delete" button. After it finishes, click "OK".

	🔹 🚍 👻 Page 🕶 Safety 🕶 Tools 🕶 👔	Internet Options	Delete Browsing History
	Diagnose Connection Problems Reopen Last Browsing Session	General Security Privacy Content Connections Programs Advanced Home page	Preserve Favorites website data Keep cookies and temporary Internet files that enable your favorite websites to retain preferences and display faster.
