

Setting Compatibility View

Microsoft Internet Explorer Version 8

Why? Some online courses will not display correctly in Internet Explorer, unless Compatibility View is enabled.

1. Click on “Tools” in the menu (tap on the Alt key first if the menu is not visible). Choose Compatibility View settings from the menu.
2. The site **uwosh.edu** should be in the “Add this website” box. If not, type it in. Then click on the “Add” button.
3. Confirm that **uwosh.edu** now shows in the websites box below. Check the “Display all websites in Compatibility View” box, and click on the “Close” button.
