### Adult Long Term Care Functional Screen

**DATE:** September 2020

**TOPIC:** September 2020 Adult Functional Screen Quiz

**Purpose:** The quiz serves to:

- Provide a user friendly tool for agency screen liaisons to help screeners improve their overall knowledge of screen instructions and procedures.
- Encourage discussion among screeners in order to arrive at the correct answers.
- Encourage screeners to think about the reason(s) for their selections and compare those with the rationale provided on the answer version of the quiz.
- Provide answers to all screeners based on real world questions that have come to the team.

Use only the information provided in the scenario to choose the best answer. Each question will have only one correct answer.

Generally the quiz is designed to encourage screeners to think about issues that are less than straightforward and may not have a specific answer in the instructions. However, in this September quiz, which is designed to help prepare for the biennial CST, screeners will be able to find the answers specifically in the instructions.

As always, do not assume any medical conditions, diagnoses, support needs, or deficits are present for any person described in any question. For instance, do not assume any person described has an intellectual disability unless the information provided tells you that the person has that diagnosis.

**Objective:** This quiz highlights the following sections of the screen: ADLs, IADLs, Additional Supports, and HRS Table.
